

Mobile Software for Transportation and Proof-of-Delivery

TransportACE™ is a flexible and ready-to-use mobile application that implements industry best practices for pickup / delivery and electronic proof-of-delivery operations. It can be quickly tailored to your unique business processes, making TransportACE the fastest and most cost effective way to streamline your transport and logistics operations.

Delivering for the Transportation Industry

Transportation and logistics companies are automating their operations with TransportACE to gain a real-time view into their supply chain and enable them to adapt quickly to a changing business environment.

TransportACE enables companies to:

- Streamline fleet operations
- Gain end-to-end visibility of deliveries through real-time tracking
- Complete more pickups and deliveries each day per driver
- Accelerate the billing cycle
- Assure compliance with company and government regulations
- Improve customer and driver satisfaction
- Eliminate manual and paper processes

Improve Supply Chain Visibility with TransportACE

TransportACE boosts the productivity of your transport and logistics operations with comprehensive workflows for your delivery personnel – from start-of-day inspection and vehicle loading to end-of-day check-in, and everything in between including:

- Load verification and adjustment
- Dynamic trip management with real-time delivery status
- Proof of delivery and exception handling
- Optional GPS tracking, fleet management and route optimization

TransportACE can be used off-the-shelf or can be rapidly tailored to the unique requirements of your business. It runs on a robust mobile platform that provides secure and reliable communication, granular over-the-air updates, flexible host integration, and system analytics to measure driver and delivery performance.

Increase DOT & FMCSA Compliance

Through a partnership with Xata Turnpike and others, TransportACE supports DOT-compliant inspections and electronic Hours of Service (HOS) logs to increase driver safety and reduce risk of violations. In addition, an optional electronic on-board recorder provides engine diagnostics, driver performance reporting, and automatic vehicle location.

TransportACE™ Features

- Load management
- Dynamic trip management
- Pickup and / or delivery
- Electronic manifests
- Real-time status and timestamps
- Customer stop detail
- Over / short / damage / returns
- Condition reports

- Barcode scanning
- Camera support
- Vehicle inspections
- Mobile printing
- Android & Windows Mobile

TransportACE™ Options

- GPS tracking
- Hours of service and IFTA reporting
- Turn-by-turn directions
- Route optimization
- Fleet management integration

Manage Your Fleet Operations

TransportACE connects readily to your existing fleet management and tracking software including RoadNet, Telogis (Intergis), Xata Turnpike and other systems to provide a complete end-to-end solution. It also provides optional GPS integration with Google Maps and integrated voice-guided navigation with ALK Technologies' CoPilot.

In addition, the optional Apacheta Management Center for Dispatch can be added to TransportACE to automate your back-end dispatch and scheduling operations. With Apacheta Management Center, you can manage your master customer data, enter pickups or deliveries, map and track your trucks, and send and receive messages or alerts.

Transport Companies Profit with TransportACE

TransportACE has proven success with private fleets, specialized transport and courier / delivery companies such as United Rentals, Dr Pepper Snapple Group, G&K Services and many others. By implementing TransportACE, customers have streamlined delivery operations, increased the number of deliveries per day, accelerated cash collection, improved compliance and enhanced customer service.

Apacheta Online SaaS Model

TransportACE can be deployed on premise behind the firewall or hosted in our secure and reliable data center through our Apacheta Online Software-as-a-Service (SaaS) option. With Apacheta Online, businesses of all sizes can quickly deploy enterprise-class solutions with minimal upfront investment and lower IT costs.

About Apacheta

Apacheta offers flexible mobile business solutions that empower companies to automate and streamline business processes in route sales, field marketing, pick up and delivery, transportation and field service. Our flexible applications are built on top of our mobile application platform and can be customized and scaled across the enterprise using common mobile workflows.
