

Mobile Software for For-Hire and Private Fleets

TransportACE™ is a next generation mobile proof of delivery application that streamlines for-hire carrier and private fleet management for truckload, LTL, courier, bulk, specialized, medical and private company pickup and delivery operations. TransportACE can be quickly tailored to your unique business processes, making it the fastest and most cost effective way to streamline your transport and logistics operations.

Delivering for the Transportation Industry

For-hire and private fleets are using TransportACE to automate and streamline their pick up and delivery options to:

- Streamline fleet operations
- Gain end-to-end visibility of deliveries through real-time tracking
- Complete more pickups and deliveries each day per driver
- Accelerate the billing cycle
- Improve asset allocation
- Increase customer and driver satisfaction
- Eliminate manual and paper processes

Improve Supply Chain Visibility with TransportACE

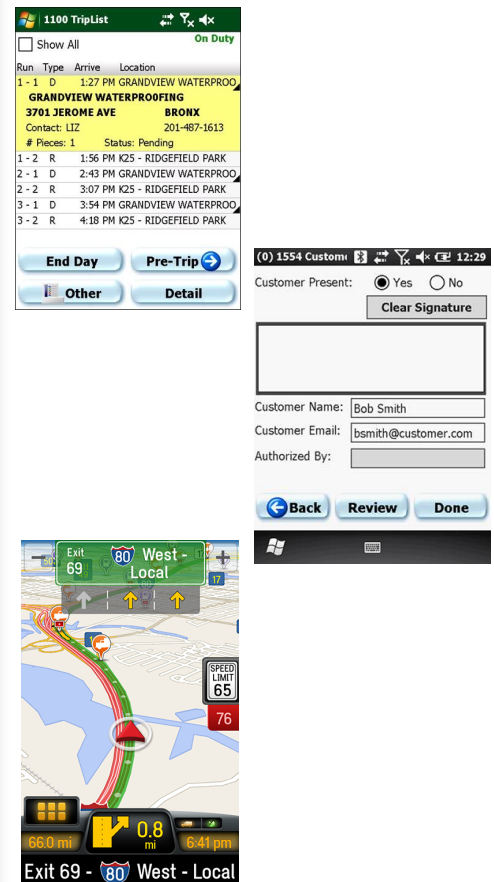

TransportACE boosts the productivity of your transport and logistics operations with comprehensive workflows for your delivery personnel – from start-of-day inspection and vehicle loading to end-of-day check-in, including:

- Load verification and adjustment
- Dynamic trip management with real-time delivery status and GPS tracking
- Flexible pick up and delivery workflows with customer detail and over/short/damage/return exception handling
- Electronic manifests with barcode scanning support
- Proof of delivery with signature capture
- Condition reports with photo documentation
- Real-time driver and delivery status with timestamps and geocodes
- Mobile printing and camera support
- Support for Android and Windows Mobile

TransportACE can be used off-the-shelf or rapidly tailored to the unique requirements of your business using the Apacheta ACE Mobile Enterprise Application Platform. Transportation companies of all sizes can utilize TransportACE, either deployed on premise behind the firewall or through our Apacheta Cloud Software-as-a-Service (SaaS) option. With Apacheta Cloud, companies can quickly deploy enterprise-class solutions with minimal upfront investment and lower IT costs.

TransportACE™ Options

- Hours of service and IFTA reporting
- Turn-by-turn directions
- Route optimization
- Fleet management integration

Increase DOT & FMCSA Compliance

Through partnerships with XRS and others, TransportACE supports DOT-compliant inspections and electronic Hours of Service (HOS) logs to increase driver safety and reduce risk of compliance violations, as well as electronic on-board recorders for engine diagnostics, driver performance reporting, and automatic vehicle location.

Manage Your Fleet Operations

TransportACE connects readily to your existing fleet management and tracking software including Ortec, Roadnet, Carrier Logistics, XRS and other systems to provide a complete end-to-end solution. It also provides voice-guided navigation using Google Maps and truck-specific navigation with ALK Technologies' CoPilot Truck software.

The Apacheta Management Center for Dispatch can also be added to TransportACE to automate your back-end dispatch and scheduling operations. With Apacheta Management Center, you can manage your master customer data, enter pickups or deliveries, map and track your trucks, and send and receive messages and alerts.

Transport Companies Profit with TransportACE

TransportACE has proven success with private and for-hire fleets such as United Rentals, New Century Transportation, Action Expediting, Plastic Express, and others. By implementing TransportACE, customers have streamlined delivery operations, increased the number of deliveries per day, accelerated cash collection, improved compliance and enhanced customer service.

About Apacheta

Apacheta offers flexible mobile business solutions that enable consumer goods, field service and transportation-based businesses to streamline their mobile operations to improve customer satisfaction, reduce costs, and increase revenue. When it comes to mobile business applications, there is no one-size-fits-all solution. That is why our mobile workflow applications can be rapidly customized to fit unique and changing business processes using our ACE Mobile Enterprise Application Platform.
