

## Mobile Proof of Delivery Software for Pathology Labs & Medical Supply Distributors

Whether you are delivering supplies to a doctor's office or picking up medical specimens for the pathology lab, timeliness and accuracy are critical to your operations. Apacheta TransportACE™ is a mobile application that streamlines pickup and delivery operations, provides advanced proof-of-delivery, tracks chain of custody, and speeds payments through billing accuracy.

### Mobile Solution Benefits:

- Streamline operations and eliminate paperwork, reducing the amount of time spent at each stop and simplifying back-office administration
- Accelerate billing cycles with electronic proof of delivery and chain of custody reports
- Meet Service Level requirements for pickup and delivery windows and ensure temperature controls are being met and documented
- Improve delivery tracking with barcode scanning, container management and item and tote-level tracking
- Manage and track delivery exceptions with optional photo documentation
- Ensure audit validity and reduce the risk of errors with chain of custody reports, electronic proof of delivery and compliance workflows to ensure procedures are followed and authorized signatures captured

### Flexible Workflows for your Medical Delivery Operations

TransportACE offers flexible mobile workflows that can be easily tailored to meet your specific business processes, combining the time-to-market and proven features of ready-to-use software with the benefits of a custom solution. TransportACE also connects readily to our Transport Manager dispatch software, as well as existing fleet management, route optimization, and navigation solutions to create a complete end-to-end solution. TransportACE can be deployed on-premise or in the cloud across a wide range of smartphone, tablet and rugged mobile devices delivering the flexibility and integration your business needs.

### TransportACE Features:

- Dynamic trip management with real-time driver and delivery status
- Proof of delivery with signature capture, photo documentation, time-stamping and geocoding
- Specimen container management and item and tote-level tracking w/scanning
- Temperature tracking
- Customer detail and exception management
- Electronic manifests with barcode scanning support
- Authorized signature capture
- Android, iOS and Windows Mobile
- Available via Apacheta Cloud service

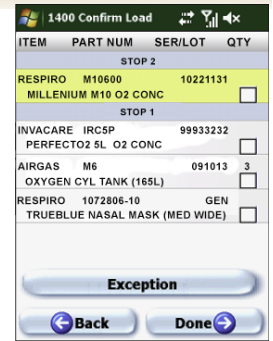

### TransportACE Options

- GPS tracking
- Turn-by-turn directions
- Transport Manager dispatch
- Fleet management and route optimization integration
- Hours of service and IFTA reporting

## Medical Supplies and Specimens

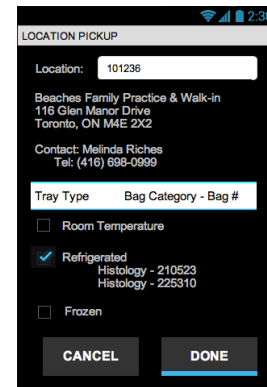

### Streamline your Medical Supply Distribution

As a medical supply company, your customers depend on getting what they need, when they need it. With TransportACE, you can streamline your delivery operations to be more efficient and make more deliveries per day. You will also accelerate your billing by eliminating paperwork, cutting back on manual errors, and providing proof of delivery documentation. With TransportACE's advanced electronic proof of delivery you can capture signatures, photo-document any damages or exceptions, and provide timestamping and geocoding for real-time tracking. And, with support for barcode scanning and tote management, you will have better control over your inventory.

### Validate Chain of Custody for your Laboratory Specimens

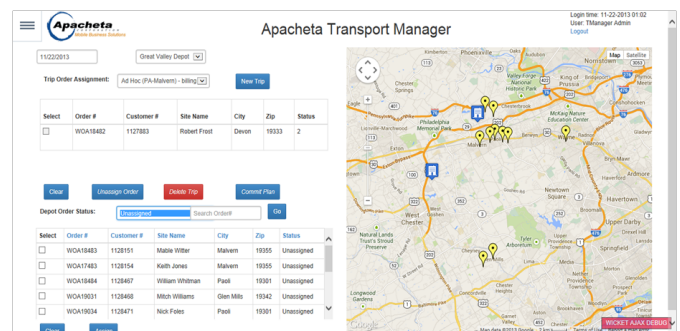

With medical laboratory specimens, speed is of the essence and errors are not an option. TransportACE provides electronic chain of custody to reduce the risk of errors and maintain audit validity. You will also have tighter control over specimens and maintain temperature controls to protect against contamination with mobile workflows, barcode scanning, and container tracking. By streamlining your pickup and delivery operations you will enhance customer satisfaction and meet your response time requirements to provide timely, accurate and reliable service.

### Transport Manager

Apacheta's optional dispatch software, Transport Manager, enables dispatchers and customer service representatives to centrally plan, schedule and monitor field force activity. Transport Manager is a web-based application deployed via the Apacheta Cloud service that works together with TransportACE to provide the following capabilities:

- View pickups and deliveries on a map and in a list
- Quickly build and organize routes
- Wirelessly dispatch routes to your field workers' smartphone, tablet or rugged mobile devices
- Receive and monitor delivery status in real-time
- Review signed proof-of-delivery documents and exceptions
- Email and archive PDFs of the proof-of-delivery documents
- View management reports that measure Key Performance Indicators such as time to service, drive time, completions, and percentages

Transport Manager also connects readily to third-party systems to create a complete solution. This includes billing management systems to receive sales orders and update status, content management software to store proof-of-delivery documents and route optimization solutions.
