

Streamline Rental Equipment Delivery and Increase Customer Satisfaction with Mobile Software

Apacheta offers an equipment rental mobility solution that empowers companies to get the **right equipment**, to the **right customer**, at the **right time** to both maximize asset utilization and increase customer satisfaction. With Apacheta's mobility solution, you can streamline your rental equipment delivery – completely eliminating paper and manual processes. With barcode scanning and mobile software your equipment will get loaded and delivered faster, while you track deliveries in real-time to ensure that your customers' projects stay on schedule.

Apacheta Delivers for Equipment Rental

Using Apacheta's mobility solution, equipment rental companies can:

- Ensure timely, accurate equipment deliveries to keep customers' projects on-time and increase customer satisfaction
- Capture electronic signatures and condition reports with pictures for proof-of-delivery that smoothes the payment process
- Reduce time spent on-site and speed driver to dispatch communications
- Turn equipment around faster to maximize asset utilization
- Improve data collection accuracy and reduce time spent on inventories
- Eliminate paper and reduce back-office costs
- Know where your trucks and equipment are with real-time tracking

Mobility Suite for Equipment Rental Operations

Apacheta offers a complete mobile solution to streamline equipment pick up and delivery, track yard inventory, and service your equipment in the field, enabling rental companies to streamline operations, increase employee productivity and maximize asset utilization.

The Apacheta solution is comprised of:

- **TransportACE** mobile proof-of-delivery software
- **TaggerACE** mobile software used to barcode tag assets and simplify equipment tracking
- **ServiceACE** mobile field service software
- **Transport Manager** (optional) web-based dispatch system to plan and track trucks and deliveries in real-time

Features:

- Dynamic trip management with real-time status and GPS tracking
- Load management with barcode scanning and exception handling
- Proof of delivery with signature capture, photo documentation, time-stamping and geocoding
- Structured equipment rental workflows
- Electronic contracts and equipment condition reports
- Transport Manager dispatch system to centrally plan, schedule and monitor field force (optional)
- Android, Win Mobile and soon iOS
- Available via Apacheta Cloud software as a service
- Turn-by-turn directions (optional)
- Compatible with third-party DOT Hours of Service and inspection products
- Integrates with Wynne Systems' rental equipment ERP software

TransportACE

TransportACE offers ready-to-use mobile workflows for equipment rental proof-of-delivery that can be tailored to your company's unique business processes. These workflows cover the entire day-in-the-life for your delivery fleet, from pre-trip inspection, through pick up and delivery, to return to yard. TransportACE also supports creating a PDF of the proof-of-delivery document, including the condition report and contract information, that can be emailed to customers and accessed by customer service.

TaggerACE

TaggerACE simplifies equipment tracking with barcode tagging of rental assets. Barcode tagging improves data accuracy while tightening up turnaround times to facilitate greater asset utilization and reduce capital investment in equipment.

ServiceACE

ServiceACE is a mobile application for field service that tracks work orders and parts for maintenance and break/fix operations to reduce customer down time.

Transport Manager

Apacheta's optional dispatch software, Transport Manager, enables managers and dispatchers to quickly plan and dispatch routes and gain real-time visibility into driver location and delivery status. This web-based application is deployed via the Apacheta Cloud service and works with TransportACE to:

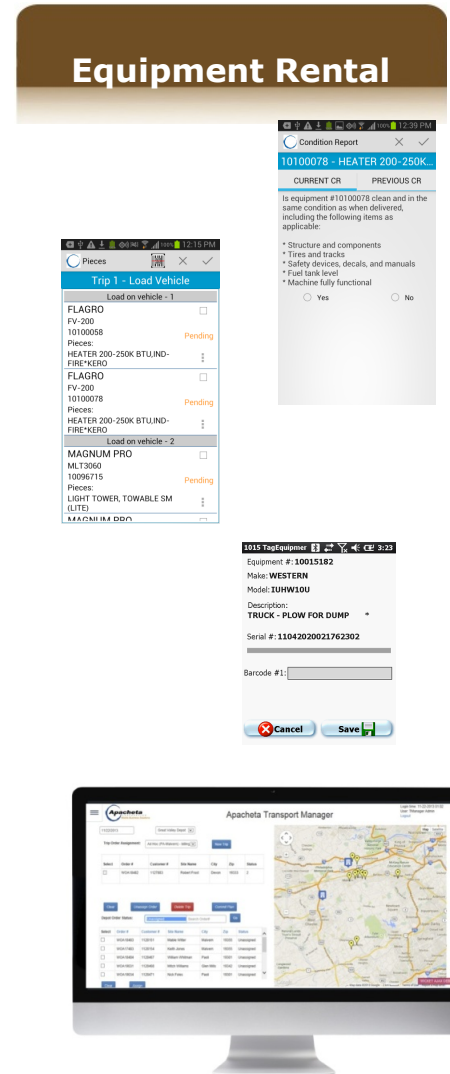

- View rental orders on a map or in a list
- Wirelessly dispatch routes to your field technicians' smartphone, tablet or rugged mobile device
- Receive and monitor delivery status in real-time
- Review signed proof-of-delivery documents and exceptions with optional email of the PDF of the document
- View management reports that measure Key Performance Indicators such as time to service, drive time, completions and exceptions

Complete Mobility Solution for your Equipment Rental Life Cycle

Apacheta software integrates readily to third-party systems for equipment rental management (Wynne Systems), fleet management and route optimization, and uses truck specific navigation to improve routing and safety. As a result, Apacheta offers a complete mobility solution for equipment rental that maximizes ROI for your field operations.
